Amazon Rainforest: The Amazon rainforest complex, the largest and most biodiverse tract of tropical rainforest in the world, with an estimated 390 billion individual trees divided into 16,000 species.

LED FLATSCREEN

Groups work together in teams in their relevant areas of expertise to coordinate the most effective strategies to address the Environmental challenges throughout the world. The same applies to the other humanitarian channels involved.

Directives:

Through Unity...

- To end: war
- To end: poverty
- To end: hunger
- To end: economic disparity
- To end: environmental destruction
- To end: human rights abuse
- To end: injustice
- To end: corruption
- To end: the inhumanity in the world

To give hope to this generation and all future generations to come, that as One People, we are capable of building a better world together.

LED FLATSCREEN

A Unified Collaborative Approach to Address the Global Humanitarian Challenges.

Principles:

- Unified and Globally Collaborative (Not Competitive)
- Humanitarian Focused
- Scientific / Evidence-based Approach
- Direct Democracy (Public Consensus)
- Internationally Supportive
- Transparent
- Open Source Global Community
- Accountable to 'The People'

“Bringing the world together in unity and global cooperation for the common good of all people”
