

A deep green economy: (and) a paradigm-shift in Economics

By Rupert Read (www.rupertread.net , @greenrupertread)

Key points:

- 1) Taking the future seriously / ending the practice of 'discounting' the future / embracing post-growth
- 2) Why, if you care for your kids, you already care for the deep future...
- 3) A 'provisioning' economy
- 4) A re-localised economy/society: Think and communicate globally, Act and protect locally
- 5) Fighting the powers that be in Economics: a deep green economics: The coming Economics revolution:
